

CHT-100R HEDGE CUTTERS

SCAN HERE
TO SEE A DEMO

The Wessex **CHT-100R** is a hydraulically driven three-blade rotary hedge cutter. It's designed to cut and shred hedges and shrub to a superb standard due to its fast spinning fine cut blades. It has a cutting head of 1m and a maximum vertical reach of 5m.

The **CHT-100R** only requires a small tractor of 800kg or more with 1 double acting hydraulic spool. So it's perfectly suited for golf and sports clubs & private estates.

- ✓ **SUPPLIED WITH CABLE CONTROLS.**
- ✓ **OPTIONAL ELECTRIC JOYSTICK CONTROLS**

✓ **FINE CUT BLADES**

KEY FEATURES & BENEFITS

- ✓ **SHARP SWINGING TIP BLADES** – The high blade speed will produce a very premium quality of cut. The blades can pivot to minimise damage and are hardened for long life.
- ✓ **MULCHING BAFFLE SYSTEM** – The cutting head retains the clippings inside the deck in order to thoroughly mulch the clippings
- ✓ **SMALL TRACTOR REQUIREMENT** – Can be fitted to small tractors and still achieve a large reach
- ✓ **REVERSIBLE FRAME** – The frame can be reversed in order to fit onto the front of tractors.
- ✓ **FRAME TILTING SYSTEM** – Possible to operate the hedge cutter on both sides of the tractor.
- ✓ **CONTROL OPTIONS** – A choice of cable or joystick controls
- ✓ **STORAGE LEGS AND FORK SLEEVE LIFT POINTS** – For ease of maintenance and storage.
