With the **STX Paddock Cleaners** in 1.2m or 1.8m widths, the chore of collecting horse muck is turned into a pleasure.

The strong and simple sweeping action of this machine will collect horse droppings, twigs and other debris into the hopper whilst the grass benefits from the regular grooming action of the bristles – an advantage not gained from vacuum machines. A powerful hydraulic ram tips debris from the hopper at a height of 1.3m into a low trailer or heap on the ground.
